Subject: Microsoft Settlement

I strongly feel that the proposed settlement does not go nearly far enough in correcting a decade of monopoly abuse by Microsoft. Even as we speak Microsoft is leveraging its illegal monopoly on desktop computers to enter the set-top, video game, and DVD player markets.

Microsoft's long standing disregard for both our legal system and their own customers is legendary among information technology professionals.

Please do NOT proceed with this settlement, which appears to be little more than a slap on the wrist of Microsoft.
